Category Name Data Server (DSS) Design

Actionee ECS

Sub Category Data Server

Related RIDs
Subcategory ID

Subject Details of DSS configurations

Description of Problem or Suggestion:

There was inadequate detail regarding planned DSS hardware/software configurations in the Release A CDR. This type of detail is also missing in the Release B IDR.

Originator's Recommendation

Provide detailed design documentation and schedule and conduct an IDR level design review for this material.

Conduct a detailed walkthrough of the design of the load management including the Data Server. The group will include the DAACs (at least EDC, GSFC, Langley). Ben Kobler will coordinate this effort.
